

HP iPAQ 200 SERIES ENTERPRISE HANDHELD

Mobilize your business process, maximize your results.

Designed for the enterprise, the HP iPAQ 200 Series Enterprise Handheld can help you solve specific business problems and meet today's mobility needs.

Designed with business in mind.

There is much to appreciate about the sophisticated design of the iPAQ 200 Series Enterprise Handheld: the large 4-inch TFT touch screen display for improved visibility in a variety of environments, the robust SDIO expansion, and the convenient I/O of headphone, microphone, voice record, and USB. You'll also enjoy the standard Microsoft Mobile Office® suite of Word, Excel, and PowerPoint; and the ability to easily synchronize Mobile Office Outlook® via mini-USB or Wi-Fi connectivity.¹

However, what you may appreciate the most is the planned three-year product life cycle, to support your enterprise testing and deployment efforts.

Enterprise-class connectivity.

Integrated IEEE 802.11 b/g wireless networking allows Internet and email access at the office or other Wi-Fi hot spots in airports, cafes and hotels.^{1,2}

With Bluetooth, connect to peripherals like headsets and keyboards.

Powerful mobile solutions go beyond the device.

Whether you're an IT manager or a mobile professional, you work in a complex environment. Your world—spanning countries and continents, an array of wireless technologies and networks, and powerful applications and communication tools—has a singular purpose: to drive business results.

HP, a global leader in technology, services, and support, understands that mission. Our mobile devices are certainly impressive – but they're just a small piece of the challenging puzzle that is your enterprise mobility program. Your business runs on key applications. Your proprietary data is irreplaceable and must be protected. Your IT effort that goes into testing, approval, deployment, and remote management is enormous.

HP can help you deploy and support your mobility strategy—from device-level support to enterprise support solutions, across geographies and vendors. Put our mobile devices and global support to work for you.

Think mobile. Think global. Think HP.

HP iPAQ 200 SERIES ENTERPRISE HANDHELD

Wireless¹	Integrated Wireless LAN: IEEE 802.11b/g with WEP through WPA2-Enterprise (EAP-TLS and PEAP) and WiFi Multimedia Integrated Bluetooth® v2.0 with EDR
